- The accessibility issues are the same as on mobile.

OUR NOTES

- The 9 contrast errors are text too faint to read against its background.
- 4 images have no description, 3 of them links, so screen readers announce them as unnamed links.
- One form field has no label. Forms are where inquiries arrive.
- 5 top-level (H1) headings; a page should have one.
- Automated tools find only part of accessibility issues. We will also check the new site by hand.

**Fort Lee, NJ** No data

**Schaumburg, IL** No data

OUR NOTES

- A rank grid searches the keyword from each point on the map and records where the business appears in Google Maps results at that point.
- GSP has no Google Business Profile yet, so there is nothing to rank. The grids are empty on purpose.
- The first scan sets the baseline. Later scans show how far around each office GSP appears.
